

# Title

## Engineering Challenge

July 20, 2022

**Problem Statement:** Write the problem statement in your own words and interpretation. What are you trying to achieve? What is being learned through this challenge?

The problem was making one of the home appliances in tinker cad and making the judge think it is the best one.

---

**Materials:** List the materials given (if any).

Chrome book(tinker cad)

---

**Approach:** Write a description of your plan to achieve the goal of the problem statement. Add drawings/sketches/CADs if possible.

**Don't think about small parts because time is limited so I had time to do large parts.**

---

**Solution:** What is your solution to the given problem?

Image on my tinker CAD show mini oven I made.

---

**Analysis:** After testing, did it achieve your goal? Either way, what could you have done better? If given more time/materials, what would you do differently?

**When I had more time I would have made it better.**
